

Do you know that you are your child's first and most important teacher?

The Parents as Teachers Program (PAT), sponsored by Stratford Parents' Place offers you developmental information, support and encouragement for your job as a parent during your child's first three years of life – when the most rapid brain development occurs.

What does PAT offer you?

- **Personal Visits** with certified Parent Educators who share child development information and bring age appropriate activities for you and your child to do together.
- **Support** for you to become the best possible parent to your baby.
- **Screenings** to make sure your baby is learning and developing on target.
- **Group Programs** at Stratford Parents' Place where you meet other families, share concerns, and participate in activities and discussions.
- **A Resource and Referral System** to help you gain access to community resources available for supporting and enriching families.

This program is available for Stratford families only.
