

Town of Stratford – Integrated Public Safety Software System

Addendum #3 to Request for Proposal No. 2011-056

Due to some confusion on the number of concurrent versus “named” users for the Public Safety System, we are clarifying the responses to questions 9, 10, 11, and 31 from Addendum #2.

The Town of Stratford will need fifteen (15) concurrent records management licenses for Police and five (5) concurrent CAD dispatch licenses.

The Town of Stratford Police Department is using approximately twenty (20) mobile laptops (model Panasonic CF-31i3) in the field that will require mobile dispatching and field reporting. The Police Department will need up to twenty (20) concurrent MDT units. Fire does not currently have any laptops in use but will need approximately fifteen (15) laptops for mobile dispatching and field reporting. EMS has ten (10) laptop computers in the field and will require access to the CAD and MDT functionality.

Our assumption is that both CAD and RMS (for Police only) information will be accessible from the MDT's. As a result, we have not included the MDT user counts as part of the concurrent users for CAD and RMS listed above. Based on this requirement, please include software pricing as required.
